

This is a TEST page using the April and May blocks and the paper piecing units.

This square measures 1". Check your printer settings and adjust if necessary

These patterns are accurately created using Adobe Illustrator and not Electric Quilt or other non-vector drawing programs. They have been published in magazines as they have been created and gone through multiple editings.

If you find that your blocks are not coming out to the 12" size, the issue is with your printer and the way it delivers the printed copy. ALL printers can have their settings adjusted; check your manual.

Make 4 copies (Photo copy or needlepunch)
